[github.com/Ahmed-Kotp](https://github.com/Ahmed-Kotp) | Giza, Egypt | Open to Remote & Sponsorship Relocation | GMT+2

## SUMMARY

Senior Mobile Engineer (React Native, TypeScript, Expo) with 4+ years shipping iOS and Android apps and 6+ years in software, trusted remotely by teams in Saudi Arabia, the Netherlands, Jordan, and the US. Nine apps in production; five taken independently all the way to the App Store and Google Play — including ElCoach, now used by more than 30,000 people. Turns the hard problems into shipped product: RAG chatbots, live voice, marketplaces, and payments, in Arabic and English with full RTL. The engineer who reviews the code, owns CI/CD, and Leads code review, CI/CD, and production release.

## CORE SKILLS

**Mobile & Frontend:** React Native (iOS & Android), Expo, React Native CLI, TypeScript, JavaScript, Cross-platform, React Navigation (native-stack), Reanimated, Hermes, New Architecture / Fabric, AsyncStorage, Deep Linking

**State & Data:** Redux Toolkit, RTK Query, Zustand, TanStack Query, REST APIs, pagination & caching, Node.js, OAuth, Firestore, Supabase, Convex, Sequelize, Secure Storage

**AI & Real-Time Integration:** Retrieval-Augmented Generation (RAG), LLM Chatbots, ElevenLabs TTS, Real-time systems, WebSockets, Socket.IO, Push Notifications (FCM, APNs), Claude Code, Cursor, Codex

**Product Domains:** Marketplace & Auctions, Payments & Subscriptions, In-app Purchases (StoreKit, Play Billing), Stripe, Multilingual apps (Arabic & English), i18n, RTL localization

**Native & Deployment:** App Store, Google Play, Android Studio, Xcode, Swift, Kotlin, EAS Build/Submit/Update, Fastlane, OTA

**Leadership & Architecture:** Technical Lead, Code Review, System Design, Software Architecture, Mentoring

**Quality & Process:** Git, GitHub, GitHub Actions, CI/CD, Jest, Sentry, Firebase Crashlytics, Firebase Analytics, Code Review, Production Ownership, Agile, Scrum

## PROFESSIONAL EXPERIENCE

### Primary Engagements

**Senior Mobile Engineer** | *Leaderline LMC — Saudi Arabia — Full-Time, Remote*

Nov 2025 – Present

*Doueh — Cross-platform marketplace/auctions app (buyers & sellers)*

App Store: [View Doueh](#)

- Built the Doueh client from zero (Expo, TypeScript): a two-sided marketplace with live auctions, timed auctions, fixed-price listings, and buyer/seller journeys, shipped to the App Store and Google Play.
- Delivered the full commerce loop in-app — payments, wallet, orders and shipment, pickup confirmation, offers/negotiation, and disputes — so a listing can go from publish to paid delivery without leaving the app.
- Implemented native modules and Expo config plugins to extend platform capabilities beyond the managed workflow, including SSL pinning to harden API communication security.
- Implemented real-time bidding, listing updates, and order notifications over Socket.IO, with FCM/APNs push, so buyers and sellers stay in the auction as prices move.
- Reduced the iOS app bundle size from 120 MB to 65 MB (about 46%) through asset optimization and dependency cleanup, improving install conversion and update speed.
- Automated build and release workflows with EAS Build, Submit and OTA, cutting manual steps out of the App Store and Google Play deployment process.

**Mid-Level Mobile Engineer** | *ElCoach Technology — Egypt — Full-Time, Hybrid*

Sep 2024 – Sep 2025

*ElCoach, SuperCoach, Physiotherabia, TheSpecialist — fitness apps for workout & diet planning*

App Store: [ElCoach](#) | [SuperCoach](#) | [Physiotherabia](#) | [TheSpecialist](#)

- Migrated legacy class-component architecture to functional components, improving maintainability across four apps.
- Partnered with customer support and analytics tooling to triage user-reported issues, reducing recurring performance-related tickets by an estimated 25–30% through targeted fixes.
- Improved app responsiveness by applying modern React Native and Redux performance best practices.
- Integrated payments across the four-app fitness suite: Stripe, Moyasar, Paymob, and in-app purchases (StoreKit / Play Billing), including subscriptions
- Integrated RESTful APIs for workout and diet-plan data, ensuring reliable sync across app screens.

**Junior Mobile Developer** | *Xcute — Netherlands — Remote*  
*Zameel — AI-powered legal-resource app for Saudi labor law*  
*Google Play: [View Zameel](#)*

- Built and integrated a RAG-powered AI chatbot, improving response accuracy over time through retrieval-augmented training.
- Designed a full mobile application for legal professionals using React Native with a Firestore backend.

**Concurrent & Freelance Projects**  
*Smaller part-time, project-based, and freelance engagements run alongside the primary roles above.*

**Senior Mobile Engineer (Contract)** | *Fablebox — Remote (USA-based company)*  
*Foxtales — AI-driven, automation-powered children's storytelling app (not yet released)*

- Own frontend integration for AI-narrated storytelling, building the interface layer connecting story content, ElevenLabs voice synthesis, and automated story-generation pipelines.
- Design child-friendly, accessible UI flows balancing interactivity with simplicity for a young audience.

**Senior Mobile Engineer r (Project-Based)** | *Roya Media Group — Jordan — Remote*  
*RoyaGold — Real-time gold price monitoring app for the MENA region (since delisted from stores)*

- Led replatforming from a responsive web product to a React Native CLI + TypeScript app, shipping stable production releases.
- Built WebSocket-driven live pricing with sub-second update latency, plus an end-to-end gold-to-cash calculator.
- Wrote unit and integration tests with Jest to catch regressions early and ensure reliability of core app features.

**Mobile Developer (Part-Time)** | *PingCode — Saudi Arabia — Remote*  
*Yalla Gym — AI-powered fitness app for workout tracking and coaching*  
*App Store: [View Yalla Gym](#)*

- Delivered a cross-platform product end-to-end on Expo/TypeScript, shipping live builds to the App Store and Google Play with subscriptions and payments.
- Built real-time coach messaging via WebSockets alongside workout, nutrition, and progress-tracking flows, using TanStack Query and Zustand.
- Used Git/GitHub for version control across the team, and built GitHub Actions workflows for CI/CD — automating linting, testing, and build steps on every pull request.

**Web & Mobile Developer** | *Freelance — Remote*

- Delivered custom web and mobile solutions for small business clients, from requirements gathering through deployment.

**Prior Experience:** Approval Medical Coordinator, Medmark TPA, Egypt (2017–2020) — pre-development career in healthcare coordination, prior to transitioning into software engineering.

EDUCATION

**Bachelor's Degree in Pharmaceutical Science**  
Modern Science and Arts University (MSA), validated by University of Greenwich, England | 2016

**Mini MBA**  
American University in Cairo (AUC)
